Company Insight Page — Generalized, Scalable Architecture

This is the **single template**. Sector-specific data plugs in optionally.

---

0. Page Header (Universal Identity Layer)

Purpose: Context + credibility

Always available

- Company Name | Ticker | Exchange
- Sector | Industry
- Market Cap
- Current Price + % Change
- Last Data Refresh Timestamp

Actions

- Add to Watchlist
- Export
- Recompute Model

No analysis here. Just grounding.

---

1. Investment Snapshot (Universal Decision Layer)

Purpose: Immediate signal

Always shown

- Intrinsic Value (Base Case)
- Current Market Price
- Upside / Downside (%)
- Valuation Status
  → Undervalued / Fair / Overvalued (rules-based)
- Confidence Band (Bear / Base / Bull)

Optional

- Price vs Intrinsic mini-chart

If this is missing, the page is useless.

---

2. Business Overview (Abstracted, Not Operational)

Purpose: Understand revenue logic without sector bias

Always shown

- One-line business description (≤25 words)
- Primary revenue drivers (textual categories, not assets)
- Customer type (B2B / B2C / Govt / Mixed)

Optional

- Revenue by segment (if disclosed)
- Revenue by geography (if disclosed)

No factories. No MW. No store count assumptions.

---

3. Growth & Scale Indicators (Generalized Replacement for Assets)

Purpose: Replace "capacity/assets" with scalable proxies

Always available (derived)

- Revenue growth (1Y, 3Y CAGR)
- Asset growth OR Capital employed growth
- Employee growth (if available)
- Operating leverage indicator

Optional (sector-dependent)

- User / subscriber growth
- Volume growth
- Order book growth
- AUM growth (financials)

This works for **any business model**.

---

4. Financial Performance (Three-Statement Core)

Purpose: Universal financial engine

Income Statement

- Revenue trend
- EBITDA & margins
- Net income trend
- Margin expansion / contraction flag

Balance Sheet

- Total assets
- Total debt
- Net debt
- Liquidity ratios

Cash Flow

- Operating cash flow
- Free cash flow (FCFF or FCFE)
- CapEx intensity
- Cash conversion quality

No assumptions. Just facts + trends.

---

5. Financial Health & Stability

Purpose: Risk-adjusted quality view

Always shown

- Leverage ratios
- Interest coverage
- Working capital trend
- Cash adequacy indicator

Flags

- Balance sheet stress
- Cash flow mismatch
- Refinancing risk (rule-based)

This replaces sector-specific risk heuristics.

---

6. Valuation Core (Fully Universal)

Purpose: Your product's spine

DCF Summary

- Equity value
- Value per share
- WACC (expandable)

- Terminal growth

Assumptions Panel

- Revenue growth
- Operating margin
- Reinvestment / CapEx proxy
- WACC components

Sensitivity Analysis

- WACC × Terminal Growth

Relative Valuation

- P/E
- EV/EBITDA
- P/B (where applicable)
- Historical multiple range

No sector exceptions. Financials are universal.

---

7. Quality & Return Metrics

Purpose: Separate quality from growth

Always shown

- ROIC vs WACC
- ROE
- ROA
- Margin stability score
- Earnings consistency score

Output

- Quality Score (0–100)
- Return Sustainability Indicator

No “moat” storytelling. Numbers only.

---

8. Peer & Sector Comparison

Purpose: Relative reality check

Always shown

- Revenue growth vs peers
- Margin vs peers
- ROIC / ROE vs peers
- Valuation multiples vs peers

Highlight

- Structural strengths
- Structural weaknesses

Relative context beats absolute metrics.

---

9. Risk Intelligence (RAG-Based, Universal)

Purpose: Filing intelligence at scale

Always shown

- Top 3–5 risks extracted from filings
- Risk category (Operational / Financial / Regulatory / Strategic)
- Risk sentiment trend

For each risk

- Severity score
- Source paragraph link
- Change vs last filing

This works for every public company.

---

10. Management & Capital Allocation

Purpose: Decision-makers matter everywhere

Always shown

- CEO / CFO tenure
- Capital allocation split:
    - Reinvestment
    - Acquisitions
    - Buybacks
    - Dividends
    - Debt reduction

Effectiveness

- Return metrics trend post allocation

No bios. Only outcomes.

---

11. Market Signals (Optional Layer)

Purpose: Timing and sentiment

Optional

- 52-week range
- Volume trend
- Volatility
- Technical indicators (RSI, MACD)

Interpretation

- Momentum score
- Trend classification

This can be toggled off for long-only users.

---

12. AI Analyst Summary (Strictly Constrained)

Purpose: Synthesis, not opinion

Structure

- What changed recently
- What the market may be missing
- Key downside trigger

Hard limits

- ≤150 words
- Every claim linked to data

If it can't be sourced, it can't be said.

---

13. News & Events Timeline

Purpose: Keep insight current

Always shown

- Earnings

- Guidance updates
- Capital raises
- Major regulatory / strategic events

Filtered for materiality only.

---

14. Auditability & Trust Layer

Purpose: Institutional credibility

Always shown

- Data sources
- Filing dates used
- Model version
- Last recompute timestamp
- Assumption change log

This is what differentiates you from retail tools.

---

15. Action Layer (Universal Close)

Purpose: Turn insight into output

Actions

- Export model
- Generate IC memo
- Run scenarios
- Set alerts
- Share report

Insight without action is dead weight.
